Hinweis:

Certains modèles PIKO peuvent être équipés d'un condensateur de protection sur la platine de la locomotive. La capacité du condensateur varie alors selon les préconisations du fabriquant du décodeur utilisé.
En cas de questions concernant ce condensateur de protection veuillez- vous adresser au fabriquant du décodeur utilisé.

Einige PIKO Modelle können mit einem Pufferkondensator auf der Lokplatine ausgerüstet werden. Die Kapazität des Kondensators richtet sich nach den jeweiligen Vorgaben des verwendeten Decoders. Wenden Sie sich deshalb bitte bei Anfragen zu möglichen Pufferkondensatoren an den jeweiligen Decoder-hersteller.

Some PIKO models are equipped with a buffer condenser on the circuit board. The capacity of the condenser depends on the respective requirements of the applied decoder. For requests about suitable buffer condensers please contact the respective decoder manufacturer.

Sommige modellen van PIKO kunnen worden uitgerust met een buffercondensator op de hoofdprintplaat van de loc. De capaciteit van de condensator is afhankelijk van de specificaties van de gebruikte decoder.
U dient zich daarom tot de fabrikant van de decoder te wenden met betrekking tot de mogelijke buffercondensatoren.
