Equipped with a chrome-nickel steel tank, this wagon is an indispensable and modern vehicle for transporting a wide variety of chemicals. It is designed to transport a wide range of substances thanks to its insulation and heating system. With a volume of 72 m³ and a tare weight of 24.5 t, it can carry a maximum load of 65.5 t. The 1.5% incline of both tank halves towards the centre of the vehicle ensures that residual quantities are emptied efficiently. The wagons are equipped with noise-reducing and environmentally friendly K-soles.

VTG

Our model: Zacens 7834 777-0, 7834-781 and 7834-782 from VTG

TECHNICAL DATA

- Length over buffers: 603 mm
- Minimum recommended radius: 600 mm
- Era VI

The PIKO Zacens chemical tank wagons are impressive on garden railways thanks to their successful design and numerous free-standing components. The wagons are ideal for forming block trains, but are also real eye-catchers as individual models and are suitable for both indoor and outdoor use.

- Steamed high-gloss boiler in chrome finish
- Highly detailed carriage floor
- Free-standing and finely perforated railings, steps and ladders
- With brake platform
- Suitable for indoor and outdoor use
- Delicate bogies
- Cotton gloves are included with the model
